CHAROLAIS

6th Annual

PRIVATE TREATY
Bull Sale

BEGINS 10:00 AM FEBRUARY 1, 2026
MOOSE JAW, SASKATCHEWAN

37

**Yearling & Extra Age
Charolais & Red Angus Bulls**

Welcome to Howe Coulee.....

On behalf of Julie-Anne, Matthew, Elise and Avery, I would like to welcome you to our 6th Annual Private Treaty Bull Sale. As we changed the focus and the way we did business in 2020, we continue to refine the experience for you, our customers. The focus of our business should always be on the customer and by changing the format of our marketing, we feel we have more time to explore your needs and how we can better meet them.

It's been a busy 6 years from being awarded Purebred Breeder of the Year in 2021 to celebrating 40 years of membership in the Canadian Charolais Association in 2022 and being honoured as the Moose Jaw and District Chamber of Commerce Ag Business of the Year in 2023. The biggest success of all is continuing to grow our business and refining the cattle we are bringing to market. With 150 cows calving between the Winter and Fall calving programs, we continue to cull harder and create a cowherd that will thrive in any environment.

You will find as you look through the offering, lots of full, three quarter and half siblings allowing you as a customer put together bulls to create the calf crop that you need. There are no accidents in this offering. We have gone to great lengths to find herd bulls to build programs on and not just the next most popular sire. Every breeding decision is made with you in mind.

This bull pen offers a large and growing offering of extra age bulls with a solid set of yearling bulls to meet your needs. These pens of bulls are built on some simple fundamentals – good temperament, sound udders and impeccable feet. After those we need to see easy fleshing, with loads of hair, top, middle with calving ease and ability to grow. Our cowherd also needs to meet these requirements and welcome you to tour through the cows at any time.

We will once again have an open house at the Farm, Sunday, January 25, 2026 from 10 am – 4 pm where we will have lunch on and beverages. But feel free to stop at the yard anytime to look through the bulls and cows.

Look forward to visiting with you!

Kelly Howe

Kelly, Julie-Anne, Matthew, Elise and Avery Howe
Howe Coulee Charolais

Our Management Program

The bulls are covered with a full herd health program. They have received the Zoetis vaccination program - Bovi-Shield Gold One Shot and Ultrabac Somnus at spring processing and a Bovi-Shield booster at weaning. The bulls were Ivomec'd in December. The extra aged bulls will be semen tested the week prior to the sale. Yearling bulls will be palpated and measured by a vet the week prior to the sale and then semen evaluated in March.

The yearling bulls were quiet weaned in September. They are developed on a ration of pellets, corn silage, protein supplement and hay to promote slow and healthy growth and ensure good hoof health. The bulls are fed a TMR based ration to ensure every bull is receiving the right mix of nutrients along with a chelated Right Now and Flaxlic Tub Mineral Program. We feel this will help testicle development and semen quality scores.

The ranch is a certified Verified Beef Production Plus operation. We see the value in the industry driven sustainability program as VBP+ is one of the certification bodies for the Canadian Roundtable for Sustainable Beef. As purebred breeders, we believe that it's imperative to work to move the bar on sustainability standards and are committed to doing our part.

Join Us For Lunch!

HKS Mario 22M

Herd Bull Alert!

HKS 22M is the type of bull we strive to produce! We decided to take him out to Agribition this fall after running with a group of cows even though he's not the type of bull that will bring home the banners, but he's the type of bull that will add "real" pounds to calves. Pounds is what makes the commercial man profit and we feel this is the type of bull that will do it. Last spring we decided to keep and utilize Mario 22M just because we feel as a breed we could use a whole lot more of him. HKS 22M has the stretch, top and muscle that we need so much more.

Selling 1/2 Possession, 1/2 Interest

HKS Java 203F - Dam of 22M

HKS Lonestar 5L - Full Brother to 22M

HKS JAEGER 18J - Sire of 22M

35M

Check out this stout Connection son. Connection has done it all here at Howe Coulee. He leaves calves stout made, loads of hair and calving ease to boot - 35M is no exception. If you're looking to get a couple more cows bred, this is a heck of a bull to look at.

HKS JP 16J - Sire of 401M

This bull just does it all. Out of a first calf heifer, 401M combines calving ease in a tank of a package. 401M is shaggy hair, thick made with a tonne of shape and performance. I've always admired this calf and unfortunately we lost his mother too early from a breeding season injury. This bull has always impressed as a calf and he is no exception now.

Legacy, Predictability, Longevity. These words describe both sides of this pedigree. We dug deep into the tank for the Mr Perfect semen who was born in 1989 and has 2178 registered progeny in Canada alone. Then on the dam side - The 226A Patsy cow has 16 registered progeny and 7 active daughters working in the herd not to mention others. We bred this cow hoping for a outcross female to retain but lucky for you, she produced a top end bull. This bull has the stretch and length that both sides of the pedigree are noted for along with an impeccable foot and loads of hair. If you're looking to add a bit of stretch and frame, pay attention to 12N.

Check out this Lexus son out of a standout extra age Connection daughter. I've always loved the Connection calves but I think his true strength will be the daughters having the next generation. This calf is thick, deep and hairy with loads of muscle and top. Couple that with calving ease bred on both sides, his calves will come out moderate and doing nothing but grow.

Every year we usually throw a couple straws of Embargo 7E semen in and every year I wonder why I didn't use more. This calving ease son out of Embargo has the hair we love to see with the length and top that's going to add to your calves at weaning. Off a moderate JP 16J female, you've seen what the JP bulls look like and now you know what the females can produce.

Here is the first of the 409L calves. He was selected to add some more power to some moderate females and he certainly has done that. 50N is a calf with the top, hip and hair I feel all Charolais bulls should have without breaking the bank with birthweight. The birthweight epd's are a bit higher on these calves but all his calves this past year - including the ones born in the fall program - were born with ease and unassisted. This is one heck of a calf off a great Senator daughter.

Another red factor calf that certainly stands out. Out of our prolific Aster cow family, this Jaegar son was moderate at birth but is so deep and soggy with a terrific temperament - just like his mother. Not very often do we have many tan bulls, but to have them of this caliber is impressive - check them out.
